

SAFE MANAGEMENT MEASURES FOR IMPLEMENTATION IN SHIPYARDS

As companies in the Marine and Offshore sector resume business operations, ASMI will like to remind all employers to make the necessary preparations to ensure that safe management measures are in place to minimise the risk of new COVID-19 infections at the workplace.

Here are eight safe management measures that shipyards can implement to help keep the marine workforce safe. Employers should ensure workplace safety and health measures are also in place as work operations restart.

8 Useful Safe Management Measures for implementation in Shipyards	
Carry out inspections	Demarcation and zoning
Controlled access - SafeEntry	Shift or split team arrangements
Eliminate close contacts as much as possible	Provide cleaning and disinfecting agents
Reduce close contact activities duration	Wear additional PPE for close contact activities (e.g. safety goggles, visor/face shield)

CALENDAR OF EVENTS (OCTOBER 2020 TO MAY 2021)

Event	Date and Venue
